[57] ABSTRACT

The invention relates to a process for stripping, from the surface of a support, a layer of paint which has been formed and hardened thereon, characterized by the requirement of a phase of pre-treating said support before the formation on the latter of the layer of paint to be stripped, said treatment consisting in applying on the support a covering product, selected among the following products: a pre-treatment vinyl resin paint, a polyurethane resin paint. It is also an object of the invention to provide products and compositions to be used in said process.
